DETAILED ACTION

Specification

Status of claims

Claims 1-14 has been deleted and claims 15-28 are pending.

Allowable Subject Matter

Claims 15-28 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance: the prior art of record teaches a multicast method transmitting data segments, sender S receives a first status signal from the at least one unknown receiver joins the multicast and retransmits data segment to the unknown receiver (see abstract).

On the other hand, the present application specifically teaches performing a synchronization to the transmitter from a first receiver of the plurality of receivers by sending a synchronization message between the transmitter and the first receiver, range of identifications for transmitted data blocks being selected in the synchronization, the first and second receivers stops sending status indications for the data blocks corresponding to the selected range of identifications; the at least two of said plurality of receivers sending an acknowledgement for the synchronization message, wherein the transmitter deletes the transmission status indications corresponding to the selected range of identifications from the transmitter window after the acknowledgements are received from a predefined fraction of the plurality of receivers. These limitation, in conjunction with all other limitations, has not been disclosed, taught or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
